

The Faculty of Biology and Medicine of the University of Lausanne, Switzerland and the University Medical Centre of Lausanne (CHUV) invite applicants for the following :

**A PROFESSORIAL GRADE POSITION (ASSOCIATE OR FULL PROFESSOR)
IN THE FIELD OF DEMENTIA AND MEMORY DISORDERS
DIRECTOR OF THE MEMORY CENTRE**

This new interdepartmental Centre will bring together specialists from the departments of neurology, psychiatry of old-age, neuropsychology and geriatrics working in the field of dementia. It will be responsible for diagnostic evaluation activities and the specialist treatment of cognitive disorders.

We are looking for a specialist in neurology, geriatrics or the psychiatry of old-age with clinical and academic experience in the exploration and management of cognitive disorders.

Candidates must be able to show:

- a high level of clinical competence in the field of dementia, including cognitive and behavioural components;
- a proven ability to carry out and promote quality research in the field of translational neuroscience connected with dementia syndromes;
- a proven ability to work and teach in a multidisciplinary environment;
- a will to engage in networking, within the scope of a cantonal plan to be created with various partners.
- a good knowledge of French or the ability to quickly acquire it.

Job description and specifications are available on the Internet site www.unil.ch/fbm/page64812.html. Further information may be obtained from Prof. Pascal Nicod (Pascal.Nicod@chuv.ch), Chairman of the Search Committee.

Candidates should send their curriculum vitae, a copy of their diplomas, a list of their publications with a copy of the five most significant ones, and a brief description of their research aims and teaching experience before April 26th, 2010 for the attention of Prof. Patrick Francioli, Dean of the Faculty of Biology and Medicine, Rue du Bugnon 21, CH-1011 Lausanne, Switzerland.

Applications from female candidates are strongly encouraged.
